RPP MEGAPAIN  
New Product Information

# RPP MEGAPAIN

Megadyne have developed a new timing belt RPP8 designed for conveyor and transfer lines, specifically for painting systems.

Belts are silicon free and do not contain contaminants, as requested for water or solvent based paints; the purity of materials and the absence of polluting particles guarantee painted surfaces always perfect and without any defect.

## Structure

- Fiberglass cords with high elastic module and a special surface treatment [2]
- Belt body [4] and back [1] made of NBR based compound with an high purity degree and without contaminating agents
- Fabric on teeth [3] with high wearing resistance, with a nitrilic based treatment to protect the external surface

## Properties

- Silicon free and without surface impurities and contaminants, according to car manufacturers' standard and tests made by Forschungsinstitut für Pigmente und Lacke e.V. of the Stuttgart University
- High resistance to ozone and adequate resistance to lubricating oils
- Working temperatures from -20°C up to 100°C
- No need at all for maintenance and lubrication
- Performances equivalent to RPP SILVER
- Complete interchangeability on RPP and HTD pulleys pitch 8M

## Range

- MegaPaint are available in the whole RPP8 range, on demand with a minimum order quantity
- Belts are delivered in a special protecting package in order to guarantee a complete surface purity from the manufacturing to the installation

# Belt Performances
